relative positions, is from an entirely different die, and not described heretofore. \mathbb{R} is too weak and poor for comparative description, although date, etc., are just visible: obv. good; possibly unique.

The idea of a Dutch origin for this piece is quite ridiculous and could have emanated only from the "History writer" for a Magazine who gets pay for quantity of guess-work material, instead of quality or accuracy of his statements.

The two last described coins were formerly the property of Hon. Chas. Thomson, Secretary to the first U. S. Congress, and were discovered about fifty years ago in the desk used by Thomson. The following letter from a former owner reads viz.:—

JNO. W. HASELTINE, Esq.
DEAR SIR:

PHILADA., May 28, 1872.

The history of the two coins which you obtained from me, viz.: Nova Constellatio, 1783 U. S. 1000 and—500, is as follows:—They were the property of the Hon. Charles Thomson, Secretary of the first Congress. At his death his property was left by "will" to his nephew, John Thomson of Newark, Del. These two coins were found in the desk of said deceased, Charles Thomson,

J. A. T. CO. 1872

and preserved by his nephew during life; at his death they came into possession of his son, Samuel E. Thomson of Newark, Del., from whom I received them; they were never out of the possession of the Thomson family until I received them.

Yours respectfully,

RATHMELL WILSON.
